

Getting the best out of your home

If you are resident of Devon & Cornwall Housing and keen to save energy and water in your home and would be willing to monitor how much you use for a month we would like to hear from you. We want to find out how affordable our homes are to live in and the only people who really know are our resident householders. To find out this information we have designed a 'getting the best out of your home' survey that can be downloaded below. To help people monitor their electricity use we can, thanks to the support of Scottish and Southern Electric, also offer a current cost meter (a clever little device that you attach to your electricity meter).

To find out more why not download and read the survey and if you are still interested in being involved please contact

Rose Hunter, Sustainable Living Coordinator

Telephone 01392 814471 or email: rose.hunter@dcha.co.uk
